ABOUT ME

Passionate about constantly learning and improving. I am always looking for new ways to challenge myself and expand my knowledge autonomously. I believe that staying ahead of the latest developments in technology is key to designing successful systems.

I would like to work with people who are open to sharing their ideas as I consider each perspective unique and necessary to achieve each goal.

WORK EXPERIENCE

FOUNDER & TECH LEAD

Artisan Technology

MAR 2022 - Present

At Artisan TECHNOLOGY, I am responsible for defining and implementing the company's technical vision and strategy. This includes selecting and managing technologies, designing system architectures, and planning infrastructure to deliver high-quality software solutions.

I lead a small but dynamic team, manage client relationships, and ensure that all projects meet deadlines and client expectations. My role involves a mix of hands-on development and strategic oversight, which has allowed us to deliver innovative, scalable solutions that meet the unique needs of our clients.

CHIEF TECHNOLOGY OFFICER

Tiqetea | STARTUP

OCT 2022 - MAR 2023

I was responsible for driving the development and implementation of the company's technical vision and strategy. This included selecting and managing technologies, designing the architecture, and planning the infrastructure. I also oversaw the development and maintenance of the platform working together with the development team.

Through my efforts, we were able to successfully build and maintain a robust and scalable platform that met the needs of our users and helped drive business growth.

TECH LEAD

GRUPO IE CORP | Lima, Perú

JAN 2020 - MAR 2023

I was in charge of analyzing the company's software requirements, designing systems that offer an integrated solution for them. I researched and chose the best technology to effectively solve each client's need. Using agile methodologies, the objectives of each project were met. I designed the systems and worked hand in hand with a team of developers.

MAIN PROJECT DESIGNED: Venue Perú, digital events platform

FULLSTACK DEVELOPER

IE CORP | Lima, Perú

JUN 2018 - JAN 2020

Developer of web systems and mobile applications. In this role, I researched and specialized in all of the listed technologies. I was in charge of a development team, which using the Kanban methodology, we worked on each project in an agile way, efficiently meeting each delivery time. Having more than 30 projects worked on different technologies.

IT PROJECT SUPERVISOR

VARIOUS PROJECTS

JAN 2013- FEB 2017
